

Thinker AI

Brand Identity Guidelines

v1.0 · June 2026

This document defines the complete visual identity, voice, and design system of Thinker AI. All designers, developers, and communicators must follow these guidelines to maintain a consistent, premium brand presence across every surface.

Contents

- 01** Brand Foundation — Personality, Promise & Taglines
- 02** Logo — Meaning, Rules & Usage

- 10** Do's & Don'ts — Quick Reference

Brand Foundation

Brand Personality

Thinker AI is calm, intelligent, and purposeful. It is not a chatbot — it is an intelligent operating system. The brand personality reflects this at every touchpoint.

Trait	What It Means in Practice
Intelligent	Reasons, validates, and challenges assumptions — never guesses
Trustworthy	Every output reviewed by multiple agents before the user sees it
Minimal	No noise, no clutter — every element serves a purpose
Premium	The experience feels crafted, not generated
Futuristic	Ahead of the curve in product, design, and thinking
Calm	Never urgent, never anxious — steady, focused intelligence

Brand Promise

Thinker AI doesn't generate the first answer. It works to generate the best answer.

Founder Statement

Thinker AI is not another chatbot. It is an intelligent operating system where multiple specialized AI agents collaborate, debate, verify, and deliver one trusted outcome.

Taglines

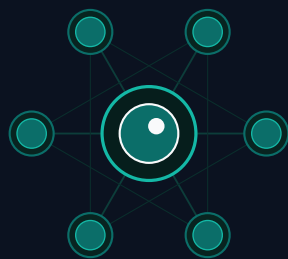

Rating	Tagline	Best For
★★★★★ Primary	Think Beyond Intelligence	App name, splash screen, primary marketing
★★★★ Secondary	Many Minds. One Intelligence.	Architecture explanation, investor pitch
★★★★ Secondary	The AI That Thinks Before It Builds.	Product description, onboarding

Logo

Logo Meaning

Element	Meaning
Center Core	Thinker Core — the orchestration brain of the entire system
Outer Nodes (×6)	The 6 primary AI Agent roles working in parallel
Connection Lines	Agent collaboration and data flow between all agents
Core Color (#0B6E69)	Active, focused intelligence — the system is thinking
Whole Symbol	Unified Intelligence — many minds, one trusted outcome

Primary Logo (Dark Background)

Always display on #0B1220 (Dark BG). Never on white or light surfaces.

Logo Rules

Always:

- ✓ Use on a dark background (#0B1220 preferred)
- ✓ Use the SVG master file for all digital surfaces
- ✓ Maintain equal clear space around the logo (minimum: logo width × 0.3)
- ✓ Keep perfect symmetry — all 6 nodes equally spaced
- ✓ Keep the Center Core glow always visible

Never:

- ✗ Add drop shadows, 3D effects, or emboss
- ✗ Use neon rainbow colors — one teal color only
- ✗ Apply glow to outer nodes — Center Core only
- ✗ Place on a light or white background
- ✗ Rearrange, add, or remove nodes

Color System

Thinker AI uses a precise dark color system. Every color has a specific role. Do not substitute or approximate these values.

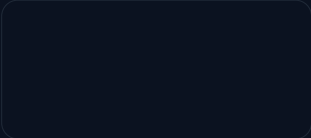

Primary Palette

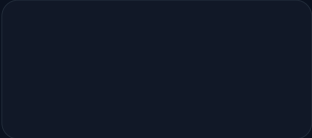

Deep Teal
#0B6E69
Primary Brand

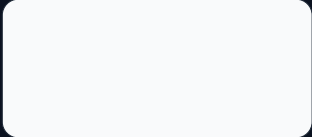

Teal Light
#14B8A6
Accents & Glow

Dark BG
#0B1220
App Background

Surface
#111827
Cards & Panels

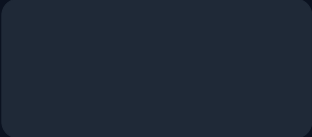

Text White
#F9FAFB
Primary Text

Text Mid
#94A3B8
Body / Secondary

Text Dim
#475569
Captions / Hints

Border
#1F2937
Dividers & Lines

Brand Gradient

Deep Teal → Teal Light. Use sparingly — primary CTA buttons, progress bars, and key highlights only.

Color Usage Rules

Color	Hex	Use	Do Not Use For
Deep Teal	#0B6E69	Primary buttons, links, active states, logo, loading	Body text, large backgrounds
Teal Light	#14B8A6	Core glow, gradient end, code text, accent highlights	Dark backgrounds, paragraph text
Dark BG	#0B1220	App background, splash screen, full-bleed sections	Cards, modals

Typography

Two typefaces only. Space Grotesk for all headings — geometric, distinctive, premium. Inter for all body text — clean, readable, universal. JetBrains Mono for all code. All three are available as Google Fonts.

Type Scale

Role	Font	Size	Weight	Use
Display	Space Grotesk	48px	Bold 700	Hero, splash screen title
H1	Space Grotesk	32px	Bold 700	Page titles
H2	Space Grotesk	24px	Bold 700	Section headers
H3	Space Grotesk	20px	SemiBold 600	Card titles
H4	Space Grotesk	16px	SemiBold 600	Labels, small headers
Body Large	Inter	16px	Regular 400	Main body text
Body	Inter	14px	Regular 400	Secondary body, descriptions
Caption	Inter	12px	Regular 400	Timestamps, captions
Label	Inter	11px	Medium 500	Tags, badges, nav items
Code	JetBrains Mono	13px	Regular 400	Code blocks, API output

Typography Rules

- Never mix Space Grotesk and Inter in the same heading
- Never use all-caps for body text — use it only for labels/badges
- Line height: 1.5× font size for body, 1.2× for headings
- Letter spacing: +0.5px for labels and badges only
- Never use a font weight outside the defined scale

Brand Voice & Messaging

How Thinker AI speaks is as important as how it looks. The voice is calm, intelligent, and shows its thinking — not just its output.

Voice Examples

■ Never Say	■ Thinker AI Says
Here is your answer.	I analyzed your goal. Here's what I found.
I generated the following code!	Here's the solution after reviewing 3 approaches.
Great question! I'd be happy to help!	Let me think through this.
Processing your request...	Analyzing your goal...
Done! Your project is ready.	Build complete. Reviewed by 4 agents. Here's what was built and why.
I might be wrong.	This is my best assessment — review before deploying to production.

Thinking Experience Messages

This is Thinker AI's signature experience. Every stage shows the user exactly what the AI is doing — not just a spinner.

Stage	Message Shown to User
Intent classified	■ / ■ / ■ / ■ [Thinking Level] — [n] credits
Clarification	Understanding your goal...
Goal Discovery	Asking the right questions...
Strategy Agent	Thinking about the best approach...
Planning	Mapping out the build...
Building	Building: [Step Name]...
Reviewing	Reviewing for quality and security...
Consensus	Validating with multiple perspectives...
Complete	Build complete. Reviewed by [n] agents.
Failover (invisible)	Still working — taking a moment longer than usual...
Halt	I've completed [n] of [m] steps. Your work is saved.

UI Design System

Theme

Property	Value	Notes
Default theme	Dark Mode	Primary — ships dark
Light mode	Secondary	Available but not default
Background	#0B1220	Dark BG — main app background
Surface / Cards	#111827	All cards, sidebars, modals
Divider	#1F2937	All dividers and outlines
Button radius	16px	All buttons
Card radius	20px	All cards
Card border	1px solid #1F2937	No heavy shadows
Shadow	None	Flat design — no shadows anywhere
Transition	200–250ms ease-out	All state transitions

Button System

Type	Background	Text	Border	Use
Primary	Gradient #0B6E69→#14B8A6	#F9FAFB	None	Main CTA — one per screen max
Secondary	#111827	#F9FAFB	1px #1F2937	Secondary actions
Ghost	Transparent	#0B6E69	1px #0B6E69	Tertiary actions
Danger	#1A0808	#F87171	1px #7F1D1D	Delete, irreversible actions
Disabled	#0C1420	#334155	1px #1E293B	Unavailable — no interaction

Spacing — 8pt Grid

Token	px	Use
space-1	4px	Tight internal padding
space-2	8px	Gap between related elements
space-3	12px	Input padding, badge padding
space-4	16px	Card padding (small)
space-6	24px	Card padding (standard)

Screen Layouts

Screen	Key Elements
Home Screen	Top: 'Thinker AI' wordmark + greeting ('Good Evening') Center: 'What are we building today?' prompt Bottom nav: Chat · Projects · Create (center CTA) · Files · Profile
Chat Screen	Message thread (user right / Thinker left) Thinking indicator between user message and Thinker reply Pipeline stage labels: Understanding → Planning → Building → Reviewing → Answer Bottom: text input + file upload + Thinking Level chip + Send
Agent View (expandable)	Hidden by default. User taps to expand. Shows live pipeline: Planning ✓ · Research ✓ · Review ✓ · Consensus ✓ Each stage shows duration and credit cost
Project Screen	Project name + status badge Timeline: Thinking → Planning → Building → Testing → Completed Download ZIP · Live Preview · Version history · Credits used
Voice Mode	Full-screen dark. Logo centered with Core Pulse animation. Minimal wave animation beneath logo. Single tap to stop.
Settings Screen	Theme · Memory · Language · Voice · Subscription · Developer Mode Each setting is a card with toggle or selector

Message Bubble Style

Sender	Background	Text	Alignment
User	#0B6E69 (Deep Teal)	#F9FAFB	Right-aligned
Thinker	#111827 (Surface)	#F9FAFB	Left-aligned

Bottom Navigation Bar

5 tabs: Chat · Projects · Create (center, Deep Teal CTA button) · Files · Profile. Lucide outline icons. Active tab: #0B6E69. Inactive: #475569.

Animation & Motion

App Open Animation — 2–3 Seconds

Time	What Happens	Easing
0ms	Black screen.	—
0–300ms	6 outer nodes fade in, 50ms apart, clockwise	ease-out
300–600ms	Connection lines draw from nodes toward center	ease-in-out
600–1000ms	Center Core brightens — Deep Teal glow pulses outward	ease-out
1000–1500ms	'Thinker AI' fades in letter by letter below logo	ease-out
1500–2000ms	Tagline fades in: 'Think Beyond Intelligence'	ease-out
2000–2500ms	Brief hold. Fade to Home Screen.	ease-in

Motion Principles

Principle	Rule
Never instant	Minimum 150ms for any state change
Never bouncy	No spring animations — ease-out enter, ease-in exit
Never a spinner	Always use 3 dots: ● → ●● → ●●● at 400ms intervals
Purposeful	Animation communicates meaning — nodes connecting = agents collaborating
Glow is reserved	Pulse animation on Center Core only — never on nodes or UI cards
Haptic: answer	Soft tap when Thinker finishes a response
Haptic: build	Medium tap when a full build completes
Haptic: error	Light shake on error — once only

Sound Design

Only 3 sounds. All very soft — never intrusive. Off by default.

Sound	Trigger	Character
Thinking	Pipeline starts	Soft, low hum — 0.5s
Complete	Build finishes	Clean, ascending two-note chime — 0.8s
Notification	Background pipeline event	Single soft ping — 0.3s

Icons

Property	Value
Library	Lucide Icons (lucide.dev)
Style	Outline only — never filled
Base size	24×24px (scale: 16 / 20 / 24 / 32px)
Stroke width	1.5px — never 1px or 2px
Color default	#F9FAFB (Text White)
Color active	#0B6E69 (Deep Teal)
Color accent	#14B8A6 (Teal Light) — sparingly
Color disabled	#1F2937 (Border)
Background	Never add a circle or background behind icons
Custom icons	If Lucide doesn't have it, draw in the same outline style at 1.5px stroke

App Icon & Splash Screen

App Icon

1024px

512px

192px

App Icon Specs

Background: #0B1220

Logo Color: Deep Teal #0B6E69

Text on icon: None — symbol only

Formats: SVG master → PNG exports

Sizes: 1024, 512, 192, 180, 152px

Property	Value
Background	#0B1220 (Dark BG)
Logo color	Deep Teal #0B6E69 with Teal Light glow on Core
Text on icon	None — symbol only, never add wordmark to icon
Format	SVG master → exported as PNG at all required sizes
Required sizes	1024, 512, 192, 180, 167, 152px
Corner radius	22.5% of icon size (iOS standard)

Splash Screen

Element	Specification
Background	Full bleed #0B1220
Logo	Center-aligned, ~120px, Core Pulse animation active
App name	'Thinker AI' — Space Grotesk Bold 32px, #F9FAFB, centered
Tagline	'Think Beyond Intelligence' — Inter 14px, #94A3B8, centered
Spacing	Logo bottom → name: 24px · Name bottom → tagline: 12px
Animation	2–3 second App Open Animation (Section 07)
Skip	Tappable after 0.5s — no visible skip button

Do's & Don'ts — Quick Reference

■ Always Do	■ Never Do
Use #0B1220 as the app background always	Never place logo on white or light background
Use Space Grotesk Bold for all headings	Never add drop shadows to any element
Use Inter Regular for all body text	Never use 3D, emboss, or bevel effects
Use JetBrains Mono for all code	Never use neon or rainbow colors
Use Lucide outline icons at 1.5px stroke	Never apply glow to outer agent nodes
Use 16px radius on buttons, 20px on cards	Never use a font other than the defined three
Show thinking progress — all pipeline stages	Never use filled icons — outline only
Use the gradient only on primary CTA buttons	Never put text inside the logo symbol
Use 'I analyzed' — never 'Here is your answer'	Never use a spinner for loading
Keep sound off by default	Never say 'Great question!' or 'Happy to help'
Use 3 dots (●●●) for loading — never a spinner	Never show provider names (Claude, GPT, etc.)
Keep the Core glow on Center Core only	Never use the gradient as a page background
Use exact hex values — never approximate	Never skip the thinking animation
Animate at 200–250ms — slow, smooth, no bounce	Never bounce or spring any animation

Think Beyond Intelligence

Every pixel, every word, every interaction must reflect one truth: Thinker AI thinks before it acts.
